
EMC Ionix Network Configuration Manager Installation and System Administration (formerly Voyence Control)

Längd: 2 Days Kurskod: VOYIA

Sammanfattning:

This course will provide the required information to effectively design, install, and manage an EMC Ionix Network Configuration Manager (formerly VoyenceControl) application in a production environment.

Målgrupp:

This course is intended for individuals responsible for designing and installing EMC Ionix Network Configuration Manager (NCM) as well as the management of systems hosting an EMC Ionix NCM installation.

Målsättning:

- Upon successful completion of this course, participants should be able to:
 - Describe the basic capabilities and architecture of EMC Ionix NCM
 - List platform support and security considerations for deploying EMC Ionix NCM
 - Describe the Distributed and Combo EMC Ionix NCM Architectures
 - Explain the sizing, security, and port considerations for an EMC Ionix NCM implementation
 - List the steps to install EMC Ionix NCM via Command Line Interface, Graphical User Interface, and silent installation scripts
 - Configure EMC Ionix NCM for an initial Network Discovery
 - Create and discover a Network
 - Describe common system administration tasks
-

Förkunskaper:

To understand the content and successfully complete this course, a student must have a suitable knowledgebase/skill set. The student must have an understanding of systems administration and basic IP troubleshooting.

A list of specific prerequisite courses can be found in EMC Education Services Learning Management System.

Test och certifiering

Assessments validate that you have learned the knowledge or skills presented during a learning experience. This course does not include an assessment.

Innehåll:

These modules are designed to support the course objectives. The following modules are included in this course:

- EMC Ionix NCM Overview
- EMC Ionix NCM Architecture and Design
- EMC Ionix NCM Installation
- EMC Ionix NCM Configuration and Discovery
- Common System Administration Tasks
- Command Line Interface
- Integration Modules

Labs:

Labs reinforce the information you have been taught. The labs for this course include:

- Design an EMC Ionix NCM Implementation
- Install EMC Ionix NCM
- Configure EMC Ionix NCM and Discover a Network
- Common Administration Tasks
- Command Line Interface
- Integration Modules
