## EMC EmailXtender Administration for Microsoft Exchange

Längd: 2 Days    Kurskod: XTEX575

---

### Sammanfattning:

This course focuses on planning, installing and configuring the EMC EmailXtender software in a Microsoft Exchange environment. The course provides a thorough overview of capturing, classifying, archiving and retrieving email using various EmailXtender components. The course contains lectures, instructor demonstrations, and hands-on labs to provide practice in a Windows 2003 environment with an Exchange 2003 mail server.

---

### Målgrupp:

This course is intended for system administrators, system engineers, support personnel, installation planners, field representatives, partners, product engineers and other individuals who will be responsible for the installation, configuration and administration of EMC EmailXtender in a Microsoft Exchange mail environment.

---

### Målsättning:

- Describe EmailXtender functionality, benefits, and components
  - Install and configure EmailXtender
  - Demonstrate the ability to properly connect to and communicate with the targeted mail server
  - Demonstrate the ability to capture email messages and archive them to the EmailXtender server
  - Describe and perform the methods for retrieving email messages that are indexed and archived by EmailXtender
- 

### Förkunskaper:

#### *Knowledge/Skills:*

To understand the content and successfully complete this course, a student must have a suitable knowledgebase/skill set. The student must have an understanding of:

- Microsoft Windows system administration
  - Network administration in a TCP/IP environment
  - Microsoft Exchange email administration
- A list of specific prerequisite courses can be found in EMC Education Services Learning Management System.

### Test och certifiering

Assessments validate that you have learned the knowledge or skills presented during a learning experience. This course includes review questions at the end of each module.

---

## Innehåll:

### Labs:

Labs reinforce the information you have been taught. The labs for this course include:

- Lab 2-1: Planning EmailXtender Installation
- Lab 2-2: Preparing Domain Controller Host
- Lab 2-3: Preparing Mail Server
- Lab 2-4: Preparing EmailXtender Server Host
- Lab 2-5: Configuring Journaling
- Lab 2-6: Installing EmailXtender
- Lab 3-1: Archiving Messages
- Lab 3-2: Working with Volumes
- Lab 3-3: Configuring Message Center
- Lab 4-2: Enabling and Disabling Retention on Folders
- Lab 4-3: Configuring Direct Search Access
- Lab 5-1: Performing Searches using EmailXtenderWeb Search
- Lab 5-2: Performing Searches using EmailXtender Search Plug-in
- Lab 6-1: Using EmailXtract
- Lab 7-1: Using Audit Reports
- Lab 8-1: Advanced Topics (User-Identity Mapping, User Directed Archiving)
